Enjoy Just-Right Warmth with the Amana® Brand's AMH95 Furnace

With your new Amana brand AMH95 Two-Stage Gas Valve, Multi-Speed Furnace with TwinComfort™ Technology, you can enjoy indoor comfort that is not too hot, and not too cold—it's just right. Thanks to our Twin-Comfort Technology, your AMH95 performs like two furnaces in one: an energy-efficient, low-stage furnace for moderately cold days, and a heavy-duty, high-stage furnace for extremely cold ones. Plus, we believe your AMH95 furnace will provide pleasant, even heating instead of the harsh, stop-and-go temperature swings of many single-stage furnaces. Best of all, your AMH95 furnace will do all of this at up to a 95% AFUE efficiency level—which can help reduce the size of your utility bills, as compared to lower AFUE furnaces. And like all of our Amana brand products, it's designed to last and last and last!

TwinComfort™ Two-Stage Heating Performance for Maximum Comfort

Our new TwinComfort Technology enhances the comfort of your home by delivering just the right amount of heat to provide steady, even warmth. Unlike conventional, single-stage furnace technology, TwinComfort technology uses two heating stages. Your furnace starts out on the low stage, enabling a gradual increase in the temperature of your home environment. And if low-stage heating doesn't warm your home to the desired temperature quickly enough, TwinComfort shifts your furnace into the high stage automatically to ensure your comfort.

In addition to providing smooth, even heating, the AMH95 will typically run more quietly than single-stage furnaces. The AMH95 helps to reduce stagnant pockets of air that can form when the furnace stops running. Plus, the number of times the air in your home goes through your air filtration system can increase, providing yet another benefit of TwinComfort technology: improved air quality.

TwinComfort™
PREMIUM HEATING PERFORMANCE

The Heart of your Amana Brand Furnace: Million-Air™ Heat Exchanger

We believe a furnace's most critical component is its heat exchanger, and we consider our patented Million-Air™ to be the most durable heat exchanger available. Formed using our patented, dual-diameter pipe and wrinkle-bend technologies, the Million-Air is built to last. One of these heat exchangers has endured over two million extreme-temperature test cycles in our laboratory and is still going strong. We are so confident in our Million-Air heat exchanger that we back the AMH95 with a **Lifetime Unit Replacement Limited Warranty*** to the original, registered homeowner for as long as you own your home.

SureStart™ Ignition System for Dependable Start-ups

Our SureStart™ Ignition System, another critical component, uses a rugged Silicon Nitride igniter.

**ENERGY STAR ratings are dependent upon conditions beyond equipment installation. To make certain your HVAC equipment qualifies for the ENERGY STAR designation, get complete information at www.energystar.gov.

High-Efficiency Performance for Lower Utility Bills

A furnace's efficiency is indicated by two factors: its AFUE rating (Annual Fuel Utilization Efficiency), which indicates what percentage of each dollar of natural gas purchased is actually used to heat your home, and the type of blower used in the furnace. And since the blower in your furnace works year-round to circulate the air in your house (yes – even when the air conditioner is running), this results in real savings.

Your Amana brand AMH95 Furnace offers up to 95% AFUE, meeting the stringent requirements of the Environmental Protection Agency's Energy Star Program. **

Designed for Quiet Operation

With your Amana brand AMH95 Two-Stage Gas Valve Furnace, you can say goodbye to the rude awakenings that may occur with a noisy furnace. Because your AMH95 furnace typically operates in low stage the majority of the time, it produces less of the normal high-fire sound produced by single-stage furnaces.

And to make your AMH95 even quieter, we fully insulate the furnace cabinet.

*To receive the Lifetime Unit Replacement Limited Warranty and 10-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec. Full warranty details available at www.amana-hac.com.

Rugged Construction that is Built to Last

Your Amana brand AMH95 Furnace's cabinet is built using high-quality, leather grain-textured, post-painted steel to resist rust and corrosion. Its elegant design and attractive two-tone Architectural Gray and Executive Gray color scheme complement other Amana brand heating and cooling equipment. And if you choose to add on to your system, the furnace has terminals for both an electronic air cleaner and a humidifier.

Premium Performance

We're so confident in the lasting power of your Amana brand AMH95 Two-Stage Gas Valve Furnace that we protect it with what we believe to be some of the best standard warranties and extended service plans in the industry – including a **Lifetime Unit Replacement Limited Warranty*** for as long as you own your home. If the heat exchanger on this unit fails on the original, registered homeowner, WE WILL SUPPLY A NEW UNIT FOR FREE. All remaining functional parts are covered by a **10-Year Parts Limited Warranty.***

For even greater peace of mind, ask your dealer or visit our web site at www.amana-hac.com for more details about **Asure**,SM an affordable Parts and Labor Extended Service Plan for your entire Amana Brand HVAC system.†

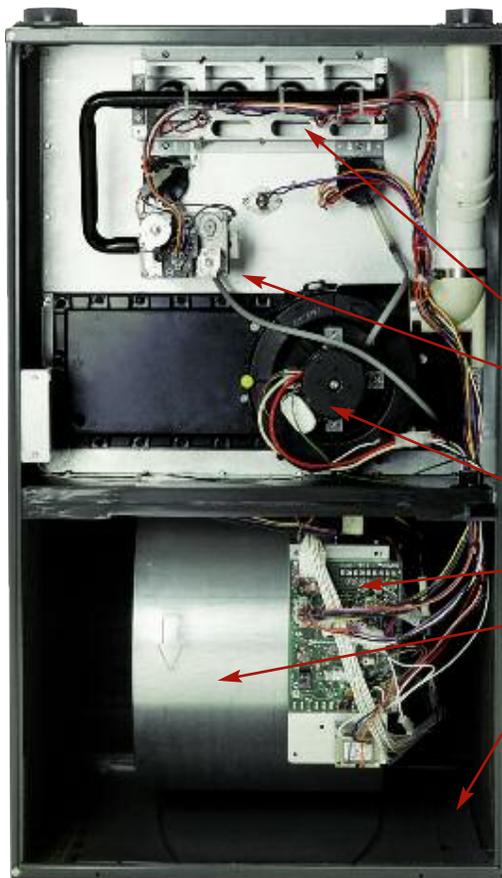

Additional Information

Before purchasing this appliance, read important information about its estimated annual energy consumption, yearly operating cost, or energy efficiency rating that is available from your retailer.

** To receive the Lifetime Unit Replacement Limited Warranty and 10-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec. Full warranty details available at www.amana-hac.com.*

- Million-Air™ Stainless-Steel Tubular Primary Heat Exchanger and Stainless-Steel Secondary Heat Exchanger
 - SureStart™ Silicon Nitride Igniter
 - Two-Stage Gas Valve
 - Durable Post-Painted Finish
 - Corrosion-Resistant Vent Blower
 - Electronic Ignition Control
 - Multi-Speed Blower
 - Fully Insulated Cabinet

† Extended Service Plans not available in all states. Ask your dealer for full details.

Amana Quality

Americans have been relying on long-lasting Amana® brand products since 1934, when Amana, Iowa, native George Foerstner accepted the challenge of building a dependable beverage cooler. Since then, the Amana brand has enjoyed many firsts, including developing the first cold storage locker, being the first manufacturer to nationally market an upright freezer for home use, and introducing the first portable countertop microwave oven.

The residents of Amana, Iowa, began a long history of pioneering and craftsmanship, and that spirit continues today in the manufacturing of quality Amana Heating & Air Conditioning products. From the technology behind our patented Million-Air™ heat exchanger to what we believe to be some of the industry's best warranties to the inclusion of high-quality filter dryers in each of our air conditioners and heat pumps, we remain committed to Amana's legacy of providing consumers with heating and cooling products that are built to last.
